PROFESSIONAL SUMMARY

Final-year B.Tech (Honors) Computer Science student with a 9.4 CGPA, strong Java fundamentals, and experience in full-stack development, applied machine learning, and workflow automation. Contributed to MERN applications, built and tested n8n workflows, and collaborated on team projects. Seeking a Graduate Software Engineer role at Zelis.

TECHNICAL SKILLS

Programming Languages: Java, SQL, PHP
Frontend: React, HTML5, CSS3, Bootstrap
Backend and APIs: Node.js, Express.js, REST APIs, JWT authentication
Databases: MongoDB, MySQL
Machine Learning: scikit-learn, pandas, NumPy, XGBoost, TensorFlow/Keras
Tools and Automation: Git, GitHub, n8n, VS Code, Vercel, Render, Figma

EXPERIENCE

Full-Stack Development Intern, TalentLync (Remote) Aug 2026 – Present

- Selected through a three-stage build drive involving application builds and interviews.
- Currently completing development training and practical exercises, with an upcoming assignment to a real-world startup project.
- Maintain a public GitHub log documenting daily learning and practice.

Founding Member, Full-Stack & AI/ML Developer, AVM Smart (Kurnool) 2025 – Present

- Contribute to collaborative full-stack and AI/ML development, including features of the AVM Smart Junior College platform.
- Created the Shyamala Home Made Foods e-commerce demo that led to the startup's first client project (Aruna's Home Kitchen); reviewed the delivered website.

Machine Learning Intern, Slash Mark (Remote) May – Jun 2026

- Completed six hands-on machine learning projects: task management, house price prediction, handwritten digit recognition, blood donation forecasting, Black Friday sales prediction and music recommendation.
- Gained hands-on exposure to data preparation, model training and evaluation using scikit-learn, pandas, NumPy, XGBoost and TensorFlow/Keras.

Web Development Intern (MERN), CodeNow Academy (On-campus) May – Jun 2026

- Contributed to a four-developer MERN project (Gym Management System) using shared Git, structured commits and code review.

Web Development Intern, Codeon Technologies (Tirupati) Jun – Dec 2023

- Learned Figma-based design and core web technologies (HTML, CSS, PHP, SQL) while building responsive pages.

SELECTED PROJECTS

Gym Management System | MERN Stack

- Developed the landing page and member dashboard (BMI-based goals, workout and diet plans) as part of a four-developer team.
- Implemented React Router navigation and role-based route separation for Admin and Member areas, working with the team's JWT authentication flow.

Workflow Automation | n8n, Gmail, Telegram

- Built and tested locally a Gmail workflow (Gmail Trigger, IF condition, Add Label) to categorize career-related emails.
- Built and tested locally a scheduled workflow that aggregates daily email statistics (count, domain breakdown) and sends summaries through Gmail and Telegram.

Computer Department Portal | PHP, MySQL | Diploma final-year project, 2024

- Led a team building the department website; coordinated the work split and integrated teammates' sections.
- Built the sports module: administrators manage players and results, and winners update automatically.

AI HR Agent | NETRIK Hackathon, IIITDM Kurnool, 2026 | Team project

- Contributed to parts of a team-built hiring pipeline.

EDUCATION

B.Tech (Honors), Computer Science & Engineering, G. Pulla Reddy Engineering College, Kurnool – CGPA 9.4 2024 – 2027
Diploma in Computer Engineering, Sri Venkateswara Govt. Polytechnic, Tirupati – 95% 2021 – 2024
SSC (Class 10), Sri Sai Vidyanikethan High School – 100%

CERTIFICATIONS

Java (NPTEL); Ethical Hacking (NPTEL); CCNA (Cisco Networking Academy); AI Advanced & Foundation (HEX); ML Fundamentals (Slash Mark)

ACHIEVEMENTS & LEADERSHIP

- Participated in five hackathons: NETRIK 2026, SIH 2024 and 2025, Amaravati Quantum Valley 2025, OUTSYSLAYER 2025.
- Published a 20-video Git & GitHub series on YouTube; 7 athletics medals; 3 years of NSS.
