KONDA SUBHASHINI

Full Stack Developer | AI/ML Enthusiast | B.Tech CSE (2027 Batch)
+91 7660839260 | subhashinikonda008@gmail.com | LinkedIn | GitHub

CAREER OBJECTIVE

Computer Science student (CGPA 9.4/10) with hands-on experience in MERN stack development, machine learning and hackathon-built AI systems, plus a strong Data Structures & Algorithms foundation in Java. Seeking a 6-month Software Engineering Internship at Zelis to build reliable, secure software and grow into a full-time engineer.

EDUCATION

B.Tech – Computer Science Engineering Aug 2024 – May 2027
G. Pulla Reddy Engineering College (JNTU), Kurnool, Andhra Pradesh | CGPA: 9.4 / 10

Diploma – Computer Science Aug 2021 – May 2024
Sri Venkateshwara Polytechnic College, BTET | 95%

SSC May 2021
Sri Sai Vidyanikethan High School, Board of Secondary Education, AP | 100%

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, PHP
Web: HTML, CSS, React.js, Node.js, Express.js, REST APIs, JWT authentication
Databases: MongoDB, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming
Tools: Git & GitHub, VS Code, Figma, N8n, Vercel, Render

EXPERIENCE

MERN Stack Development Intern – CodeNow Academy, Kurnool (In-Person) May 2026 – Jun 2026
- Developed a full stack Gym Management System (MongoDB, Express.js, React.js, Node.js) covering member management, subscriptions and admin workflows.
- Built RESTful APIs with JWT-based authentication and role-based access; deployed frontend on Vercel and backend on Render.

Machine Learning Intern – Slash Mark IT Solutions (OPC) Pvt. Ltd (Remote) May 2026 – Jun 2026
- Completed a 6-project ML curriculum spanning classification, regression and recommendation systems.
- Built a CNN-based digit recognition system, a logistic regression blood-donation forecasting model (AUC 0.7577), and a music recommender using TF-IDF, KNN and SVD.

Web Development Intern – Codeon Technologies, Tirupati Jun 2023 – Dec 2023
- Built responsive web UIs using HTML, CSS, JavaScript and PHP; designed wireframes in Figma for client-facing prototypes.

PROJECTS

AI HR Agent – Hiring Pipeline Automation (Netrik Hackathon, IIITDM Kurnool) Feb – Mar 2026
- Engineered an end-to-end NLP and LLM pipeline automating resume screening, candidate ranking and interview question generation for 1,200+ candidates.

SYNTHIA – Multimodal AI Content Platform (Outsyslayer Hackathon) Feb 2026
- Built a platform that generates text, images, audio, code, mind maps and presentations from a single prompt.

Computer Department Web Portal – Final Year Diploma Project 2024
- Built a multi-page department website (HTML, CSS, JavaScript, PHP) covering faculty, projects, semester subjects, sports and alumni, with demos like an online voting system and IoT home automation.

N8n Gmail Automation Workflows – Personal Project 2024
- Built N8n workflows connected to the Gmail API that automatically label 100+ incoming emails per day.
- Added a daily email digest delivered to both email and Telegram, reducing inbox review time by ~70%.

ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon 2024 & 2025 – built a Smart Education System and a Smart Vehicle Tracking System for Tier 2 & 3 cities.
- Amaravati Quantum Valley Hackathon (College Level) – designed a Fleet Logistics Optimization solution using QAOA and Quantum Annealing.
- 2nd Place – INNOV8 Nutshell Program; 2nd Place – Figma Design Competition (15 teams).
- @subhashini_speaks (Instagram & YouTube) – educational tech channel; creating a 20-video Git & GitHub tutorial series plus CS fundamentals and new-tech explainers, scripting and editing all content myself (2026 – Present).
- NPTEL certifications: Java Programming, Ethical Hacking | NSS Volunteer (3 years) | District-level player: Kho-Kho & Athletics.
